

Biochemical and Biophysical Journal of Neutron Therapy and Cancer Treatments Call for Papers

Dear Colleagues:

I am writing to cordially invite you to submit or recommend papers to ***Biochemical and Biophysical Journal of Neutron Therapy and Cancer Treatments*** (BBJNTCT, ISSN: xxxx-xxxx), a fast track peer-reviewed and **open access** academic journal published by Research Publisher, Inc., which is one of the newer open access journal publishers with more than 39 journals. To date these journals have been indexed by many important databases.

As an Open Access Journal, **BBJNTCT** devotes itself to promoting scholarship in *biomedicine, nanotechnology in medicine and other related areas* (<http://researchpub.org/journal/bbjntct/aims%20and%20scope.html>) and to speeding up the publication cycle thereof. Researchers worldwide will have full access to all the articles published online and be able to download them with zero subscription fee. Moreover, the influence of your research will rapidly expand once you become an Open Access author, because an Open Access article has more chances to be used and cited than does one that plods through the subscription barriers of traditional publishing model. BBJNTCT covers many aspects in *chemistry, biochemistry, biophysics, biotechnology and biomedicine*. For more detailed information, please visit: <http://researchpub.org/journal/bbjntct/bbjntct.html>. All manuscripts must be submitted electronically through email to the editor-in-chief at bbjntct@researchpub.org. Publication fees will be waived fully or partially for outstanding papers, as determined by our reviewers and the editor-in-chief. Please refer manuscript format and style guideline on our site (<http://www.researchpub.org/Authors.html>). Submitted papers are evaluated by anonymous referees for contribution, originality, relevance, and presentation. Our editor-in-chief will inform you of review result as soon as possible. Please do not hesitate to contact us if you have any questions about the journal. You are more than welcome to keep us updated on the latest focuses of your academic interest and inquiries. We would also appreciate it very much if you could forward this message to fellow colleagues and researchers who might be interested in submitting their work to this unique journal.

Best regards.

Dr. Hiroyuki Nakamura
The Editorial Board of BBJNTCT
